

ROMANIA

MODEL NATIONAL COORDINATOR Energy Cities Network Romania

Camelia Rață, Executive manager

What opportunities are there for cities joining MODEL in your country?

“The MODEL project represents the commitment and determination of a team formed by 6 important cities from Romania. Our team will try in the period of 30 months to put the energy issues in the center of activities of the local administration. We hope that the best will win!”

The Romanian participants in the MODEL project are:

- 1. Aiud Municipality**
- 2. Baia Mare Municipality**
- 3. Brașov Municipality**
- 4. Bucharest – 1st District**
- 5. Deva Municipality**
- 6. Târgoviște Municipality**

MODEL PILOT CITIES

AIUD

“Aiud Municipality’s participation to the MODEL project is generated by the obvious necessity of the local authorities’ involvement in the management of the issues concerning energy strategies and politics. Our plans follow: determining the people to be aware of the rational use of energy and the environment’s protection, the lively implication of the population in the local projects.”

Mr. Mihai Horațiu Josan, Mayor of Aiud Municipality

BAIA MARE

“In order to become a “model” municipality at regional and national level, we are very interested and preoccupied to improving the citizens’ living standards here in Baia Mare municipality. The reduction of energy consumption from both economic and social sectors, as well as identifying alternative energy sources, represents a major interest for the local administration. We will therefore ensure our full commitment to the successful implementation of the MODEL project.”

Mr. Cristian Anghel, Mayor of Baia Mare municipality

With the support of:

BRAȘOV

“Sustainable development and energy management are not new concepts in Brasov. Ever since the local energy management agency has been established here, we have defined our local energy strategy. Now we want to go further and enforce this strategy. We believe that by being one of the pilot cities in MODEL project, we will not only benefit from the experience of other pilot cities but also from the functional models of municipal energy management developed through MODEL.”

Mr. George Scripcaru, Mayor of Brasov municipality

BUCHAREST – 1ST DISTRICT

“We are concerned for the citizens of the 1st District of Bucharest to become more aware of the importance of reducing the CO2 emissions, the rational use of energy and protection of the environment. We had promoted at the level of the 1st District of Bucharest these healthy principles through information campaigns and different projects with the help and the involvement of local communities. We will support and encourage any project concerning the rational use of energy sources.”

Mr. Ioan Andrei Chiliman, Mayor of Bucharest 1st District

With the support of:

DEVA

“The City Hall of Deva takes part in the European project MODEL because the local authorities want to change the citizens’ outlook, and not only, about energy efficiency, by accomplishing the existing problems and finding out how to solve them, in order to obtain the results mentioned in the project.”

Mr. Mircea Muntean, Mayor of Deva municipality

TÂRGOVIȘTE

“Târgoviște Municipality is involved in the MODEL because the local authorities want to raise awareness amongst the citizens of the city. This can be achieved by discovering the local problems and using the projects methods and tools to solve these problems”

Mr. Iulian Furcoiu, Mayor of Targoviște municipality
